Dynamic Analysis Report

Generated 2026-11-12 02:27 | CAPE task 23

FINAL VERDICT

MALWARE

CONFIDENCE

57%

CAPE SCORE

5.2 / 10

Why this verdict

- CAPE score: 5.2 out of 10.
- 1 high-severity behavior signature triggered.

Confidence reflects how far the evidence sits from the malware/benign boundary. It is a heuristic, not a calibrated probability.

Sample details

File name	test.bat
File type	ASCII text, with CRLF line terminators
Size	39 bytes
MD5	4fff8b79c244b2ecb275b4e34f124a3e
SHA-1	aa87d1b79e0ccce4cc1b351a109c5f90c748881b
SHA-256	53735172facca2144125df16f9f504c286920055d6a17b0f59ab2aee5e42db0f
Run time in guest	148 s
Total scan time	-

Behavior signatures (6)

Severity	Signature	Description
High	hardware_id_profiling	Queries the Volume Serial Number or Physical Hardware ID, possibly for anti-sandbox, victim profiling or environmental keying
Medium	privilege_elevation_check	Queries process token information to check for Administrator privileges or UAC elevation status
Medium	suspicious_ping_use	A ping command was executed with the -n argument possibly to delay analysis
Medium	uses_windows_utilities	Uses Windows utilities for basic functionality
Low	queries_locale_api	Queries the computer locale (possible geofencing)
Low	language_check_registry	Checks system language via registry key (possible geofencing)

MITRE ATT&CK techniques (0)

None reported.

Observed behavior

Commands executed (2)	C:\Windows\system32\cmd.exe /K "C:\Users\JW\AppData\Local\Temp\test.bat" ping -n 5 127.0.0.1
Files written (1)	\??\nul
Files deleted (0)	-
Registry keys written (0)	-
Mutexes (0)	-
Services created (0)	-

Network activity

Hosts contacted (0)	-
Domains (1)	domain=www.msftconnecttest.com, ip=23.211.242.119
HTTP requests (0)	-
TCP / UDP connections	0 TCP, 33 UDP

Dropped files (0) and extracted payloads (0)

No files dropped.

This verdict comes from automated dynamic analysis in a sandbox with a limited run time. Malware that waits, detects the sandbox or needs user interaction can look benign. A BENIGN verdict does not guarantee a file is safe.
